

This is a free country tell them to leave XM radio alone. I drive a truck and I find the instant traffic and weather channels on XM radio very useful. This is America and I think the people have a choice and say as to what they want. If commercial radio is so worried about XM radio they should improve their service, XM radio provides a service, I pay for that service to receive great programming XM has to offer. Like I said its America and I have a choice and I pay my hard earned money for XM radio. TELL the Washington boys to leave it alone
